

# RotoBase

The RotoBase is rotationally molded using recycled black plastic material. It is one-piece lightweight, easy to clean, rugged, and rust free. The RotoBase features the Rotonics bolt through construction for ease of assembly, and can be used with most caster types and patterns. The RotoBase is standard on BLT's, as well as bushel, utility and flare trucks.

- Rust Free
- Light Weight, One Piece
- Easy to Clean
- No Sharp Edges
- Recycled Material
- Extremely Durable
- Impact Resistant Polyethylene

## Custom Applications

Rotonics has become a major resource and innovator to the commercial laundry industry. Mold-in Graphics, tow-hitch, retractable lids, and locking mechanisms are just examples of features designed to meet customers specific requirements.
