- Compliant with local, state, and national standards for fire protection
- FDA-approved high density linear polyethylene
- Designed for containment of water (8.5 lbs./gal.)
- Opaque tanks blend with the environment, provide additional protection from UV rays, and reduce algae growth.
- A concrete pad is recommended for installation. However, tanks may be placed on any flat level "compacted" surface.
- Optional 1-1/2" fill and 2" discharge adapter. Optional 4" fire adapters, anti-vortex assemblies, and 3" water tank vents are also available.
- Seamless, one piece construction
- Impact and corrosion resistant
- Available in green or desert tan

*Larger lids optional

- Available in crosslink polyethylene or FDA-approved high density linear polyethylene.
- Extremely durable crosslink material available for critical applications.
- All vertical tanks are designed with a heavy duty wall for containment of liquids up to 16.5 lbs./gal. 1225 - 6500 gallon vertical tanks are also available in Standard Wall for containment of liquids up to 12.5 lbs./gal.
- Vertical Tanks are available in natural, green, and various other colors upon request.
- UV stabilizers aid in resistance to environmental aging.
- Fittings, valves, and fabricated accessories are also available.
- Impact and corrosion resistant
- Seamless, one piece construction
- Always check chemical compatibility before use.
- Tanks can be equipped with heat tracing and foam insulation, which assists in maintaining thermostatically controlled uniform temperatures of tank contents.

Containment Basins

with Off-Set Flange

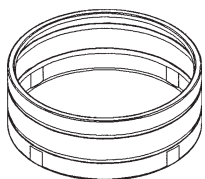

Item#	Size (Gal.)	Basin		Basin Ht. (In.)	Interior Tank Size (Gal.)
		Outside Dia. (In.)	Inside Dia. (In.)		
6548	80	33	25	27	70

6561	800	61	50	68	710

- Available in crosslink polyethylene or FDA-approved high density linear polyethylene.
- The off center opening on the containment basins with the offset flange is designed to permit easy installation of the pump, and allows more room for connections.
- Offset flange containment basins are available with permanent or removable covers.
- Offset flange containment basins are available with an optional weather-stripping gasket which aids in reducing the amount of debris and moisture that enters the basin.
- Containment basins limit the likelihood of costly and time consuming spills, leaks, and overflows, which assists in avoiding stiff penalties from local, state, and federal agencies.
- Seamless, one-piece construction
- Impact and corrosion resistant
